

WATERBOY WINTER TROUGH

Waterboy Winter Trough is an insulated.

In its standard form, it comes with 4 drink tubes and a steel separating panel (above has 4 way separating panel). It can be ordered with up to 8 drink tubes (400 cows) or 7 drink tubes when placed over a well.

Unit can bolt down to a footing but is also easily moved using bale forks.

Standard unit starts at \$4499.99

Then you add the appropriate solar pump and battery package.

Save power in your yard or keep cattle out where the feed is. Save fuel, time and your machines. These also allow you to winter cattle where you want the manure.

Funding is available undermeant government environment farm plans.
